

(c) Limited observations

Case C · saved development case

What can my recent activity and assessment records establish?

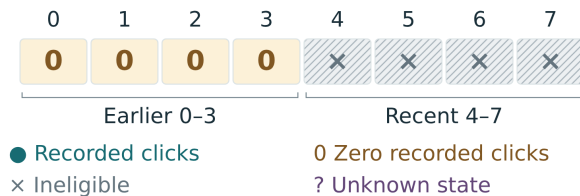

Earlier weeks 0–3 · recent weeks 4–7
Course BBB · 2013B · through day 55

0 observed weeks in the recent window

Selected peer comparisons have insufficient support.

Original compiler context: observation timeline

Administrative eligibility & click-record state

Recorded clicks / eligible day **Unavailable**

Non-banked submissions / week **Unavailable**

Scheduled assessments without recorded submission / week **Unavailable**

Presentation peers: 1,065 people / 4,207 person-weeks, weeks 4–7.

Unavailable is not zero. Eligibility is administrative; logging completeness is unknown. No inference about effort or learning. Grade limits are original compiler context: release times are unknown.

(d) Assessment activity

Case D · saved development case

What do my assessment records show about submissions and learning?

Earlier weeks 0–3 · recent weeks 8–11
Course AAA · 2013J · through day 83

Non-banked submissions

0.25

per observed week · weeks 8–11

Peer 0.07 · difference +0.18.

Peer mean 95% CI [0.05, 0.08].

Scheduled assessments without a recorded submission

0.00

per observed week · weeks 8–11

Peer 0.00 · difference 0.00.

Peer mean 95% CI [0.00, 0.00].

Scheduled assessment record states

● Due day 19 · state as of day 20

Non-banked submission recorded

○ Due day 54 · state as of day 55

No non-banked submission by week end

4 observed focal weeks · 218 peers / 867 person-weeks.
Reference: presentation peers, weeks 8–11.

Marks and banking approval are unavailable; release times are unknown. Records do not establish learning, effort or failure. Due-date states are dated snapshots, not grades. CIs describe peer means only.
